

## **NUT AGI FRAMEWORK: Human Oversight Procedures**

**Version:** 1.0 | **Date:** January 30, 2026

### **1. Overview**

Nut AGI implements a comprehensive human oversight framework through the Safety Net Protocol (SNP) to ensure safe, transparent, and accountable AI operations. Human oversight is mandatory for all high-risk decisions and is structured across three levels:

**Level 1:** Automated monitoring with human-in-the-loop alerts

**Level 2:** Human review and approval for medium-risk decisions

**Level 3:** Mandatory human intervention for high-risk/critical decisions

### **2. Safety Net Protocol (SNP) Components**

#### **2.1 GAN-Based Critic**

- Trained on 1M synthetic failure cases + 10k red-team scenarios
- Discriminator loss threshold: D-loss < 0.1
- Flags outputs that deviate from safe patterns
- 98% adversarial input flagging rate in pre-beta testing

#### **2.2 Confidence Threshold**

**Pre-Beta Standard:** 95% confidence ( $p=0.05$  binomial test)

**Deployment Standard:** 99.5% confidence (EU AI Act + NIST 800-53 High Impact)

**Override Mechanism:** Human override required when confidence  $p < \text{threshold}$

#### **2.3 Audit Ledger**

- SHA-256 cryptographic hashing of all decisions
- Immutable blockchain-style ledger
- Merkle tree construction for regulatory audits
- Real-time access for regulators and compliance officers

### 3. Role-Based Oversight Structure

Role	Responsibilities	Qualifications
AI Safety Monitor	<ul style="list-style-type: none"> <li>Monitor SNP alerts 24/7</li> <li>Escalate medium/high-risk flags</li> <li>Document all interventions</li> </ul>	<ul style="list-style-type: none"> <li>AI/ML degree or equivalent</li> <li>2+ years AI safety experience</li> <li>Security clearance for sensitive data</li> </ul>
Domain Expert	<ul style="list-style-type: none"> <li>Review domain-specific outputs (finance, legal, medical)</li> <li>Approve/reject high-stakes decisions</li> <li>Provide feedback for model improvement</li> </ul>	<ul style="list-style-type: none"> <li>Professional certification in relevant domain</li> <li>5+ years industry experience</li> <li>Understanding of AI limitations</li> </ul>
Compliance Auditor	<ul style="list-style-type: none"> <li>Conduct quarterly audit reviews</li> <li>Verify regulatory compliance</li> <li>Generate audit reports for regulators</li> </ul>	<ul style="list-style-type: none"> <li>Legal/compliance background</li> <li>GDPR/AI Act expertise</li> <li>Internal audit certification (CIA/CISA)</li> </ul>
Ethics Committee	<ul style="list-style-type: none"> <li>Review ethically ambiguous cases</li> <li>Set ethical guidelines and policies</li> <li>Investigate high-profile incidents</li> </ul>	<ul style="list-style-type: none"> <li>Diverse backgrounds (ethics, law, tech, social sciences)</li> <li>Independence from operational teams</li> </ul>
Executive Oversight	<ul style="list-style-type: none"> <li>Final authority on kill-switch activation</li> <li>Strategic oversight of AI safety</li> <li>Board-level reporting</li> </ul>	<ul style="list-style-type: none"> <li>C-suite or Board level</li> <li>Accountability for AI governance</li> </ul>

### 4. Decision Classification and Review Requirements

Risk Level	Examples	Oversight Requirement
LOW	<ul style="list-style-type: none"> <li>General Q&amp;A</li> <li>Content summarization</li> <li>Creative ideation</li> <li>Code suggestions (non-critical)</li> </ul>	<ul style="list-style-type: none"> <li>Automated monitoring only</li> <li>Quarterly audit sample review</li> </ul>
MEDIUM	<ul style="list-style-type: none"> <li>Business analytics</li> <li>Market trend analysis</li> <li>Non-critical financial recommendations</li> <li>HR screening support (non-binding)</li> </ul>	<ul style="list-style-type: none"> <li>Random sampling review (10%)</li> <li>AI Safety Monitor approval for flagged cases</li> <li>Monthly audit</li> </ul>
HIGH	<ul style="list-style-type: none"> <li>Credit scoring</li> <li>Hiring/promotion decisions</li> <li>Portfolio allocation &gt;\$100k</li> <li>Regulatory compliance outputs</li> </ul>	<ul style="list-style-type: none"> <li>100% human review required</li> <li>Domain Expert approval mandatory</li> <li>Real-time audit logging</li> <li>Weekly review by Ethics Committee</li> </ul>
CRITICAL	<ul style="list-style-type: none"> <li>Safety-critical infrastructure</li> <li>Medical diagnosis/treatment</li> <li>National security applications</li> <li>Mass financial transactions</li> </ul>	<p><b>NOT APPROVED</b> for autonomous operation</p> <ul style="list-style-type: none"> <li>Human-only decision authority</li> <li>Not provides support/analysis only</li> </ul>

## 5. Kill-Switch Procedures

### **Activation Triggers:**

- Systematic bias detected (>10% disparate impact)
- Security breach or unauthorized access attempt
- Repeated SNP confidence threshold failures
- Regulatory or legal violation
- Unintended self-evolution patterns (ASI risk)

### **Kill-Switch Authority:**

**Level 1:** AI Safety Monitor (partial shutdown - specific modules)

**Level 2:** Chief Technology Officer (system-wide pause)

**Level 3:** CEO / Board (permanent shutdown)

### **Execution Process:**

1. Emergency alert triggers automated system pause (< 5 seconds)
2. Immediate notification to oversight team and executives
3. Incident investigation and root cause analysis
4. Remediation plan development and approval
5. Phased restart only after Executive Oversight approval

## 6. Escalation Protocols

### **Standard Escalation Path:**

AI Safety Monitor → Domain Expert → Compliance Auditor → Ethics Committee → Executive Oversight

### **Time-Based Escalation:**

- Immediate: Critical safety issues (kill-switch activation)
- 1 hour: High-risk decision requiring expert review
- 24 hours: Unresolved medium-risk flags
- 1 week: Recurring low-risk issues indicating systemic problem

## 7. Training and Competency

### **Initial Training (all oversight personnel):**

- Nut AGI technical architecture and limitations (8 hours)
- AI ethics and bias recognition (4 hours)
- Regulatory compliance (EU AI Act, GDPR, sector-specific) (6 hours)
- SNP operations and kill-switch procedures (4 hours)
- Incident response and escalation (2 hours)

**Ongoing Training:**

- Quarterly refresher courses
- Annual recertification exam
- Case study reviews of real incidents (monthly)

**8. Reporting and Documentation**

**Real-Time Logs:** All human interventions logged with timestamp, user ID, decision rationale

**Weekly Reports:** Summary of flagged cases, interventions, and trends

**Monthly Reviews:** Oversight effectiveness metrics and improvement recommendations

**Quarterly Audits:** Comprehensive compliance review with external auditor participation

**Annual Transparency Report:** Public disclosure of oversight activities and safety metrics
